

Soft starters

## Altistart 01

The *starting* solution...

For single-phase and 3-phase asynchronous motors  
from 0.37 to 75 kW / 3 to 85 A.

# Altistart 01

Welcome to the **Simply Smart\*** world, compliments of **Telemecanique...**

The Altistart 01 combines **compactness** and **simplicity** for motor starters whilst providing complete smoothness.

## *The most compact in its category!*

Put an end to surges that can cause unnecessary wear to your machines, adversely affect your production or even be the source of incidents! Select soft starting and stopping for your asynchronous motors in **optimal conditions** for:

- the machine being driven,
- the mains supply,
- the motor.

### Maximum simplicity!

- Very easy to set-up:
  - Simplified cabling and connection (same components as used for an electromechanical starter).
- Quick adjustments:
  - adjustable starting and deceleration times: 5 s or 10 s.
  - Adjustable unjamming torque.
- Simple diagnostics by two LEDs.
- Signalling on completion of starting.
- 24 V integrated power supply (ATS01N2....).

### EMC pollution mastered

- Integrated bypass contactor.

### Assured economy

- Save time with quick setting-up, prevent premature wear of your machines...

Functions related to **the requirements of your machine...**

For **suppressing torque surges on starting** (freewheel stop).

**Altistart 01N1**  
from 3 to 12 A

- Minimum dimensions to further reduce the size of your enclosures.

**Dimensions:**  
(up to 6 A)  
width : 22,5 mm  
height : 100 mm  
depth : 100 mm

For suppressing torque surges on starting **and soft stopping.**

- Limitation of current peaks and suppression of voltage drops.

**Altistart 01N2**  
from 6 to 32 A

- Starting-up assured using the "Boost" function (for difficult starting conditions).
- Plug-in connector for control part.

**Dimensions:**  
(up to 12 A)  
width : 45 mm  
height : 124 mm  
depth : 113 mm

For suppressing torque surges on starting, soft stopping... and for control at any instant of your application.

**Altistart 01 model U**  
from 6 to 32 A

- Control and communication functions with **TeSys® model U.**

### Standards and certifications

IEC/EN 60947-4-2, C-TICK

\*Simply Smart: more ingenuity and intelligence for continually improving ease of use

# Tailor-made *solutions...*

## *Ease of use* with complete motor starters

Increase performance and simplify the design and setting-up of your installations by combining the Altistart 01 starter with Telemecanique components.

### Guaranteed combinations!

- Selection guides with the various appropriate components.
- Circuit-breakers,
- Differential circuit-breakers,
- Contactors...

### Simplified integration in enclosures

- Perfect mechanical assembly for ease of mounting.
- Minimum dimensions.

### Optimal safety

- Magnetic protection in event of short-circuit
- Thermal protection in event of overload...

- Circuit-breakers,
- Contactors....

## A small investment for *big advantages*

With TeSys® model U, benefit from a **unique motor starter solution**:

- Perfect integration in automation systems
  - Information regarding the motor status.
  - Remote access to this information by bus or local access using the multifunction control unit and PowerSuite parametering software.
- Openness to applications provided by function modules.

1<sup>st</sup> motor starter-controller: TeSys® model U.

Mounting kit  
Simplified mounting,  
optimised size.

# ...for your applications

■ Power: from 0.37 to 5.5 kW

Small compressors.  
Fans.  
Small conveyors.  
Automatic doors...

Reduction of surges on starting:

- Suppression of mechanical wear by eliminating slipping belts.
- Increase in service life of machines.
- Reduction of mechanical shocks.

■ Power: from 0.75 to 15 kW

Pumps.  
Fans.  
Conveyors, mats.  
Washing gantries...

- Controlled deceleration:
  - pressure surges eliminated,
  - protection of loads being handled,
  - soft stopping.
- Limitation of current peaks on starting:
  - reduction of power installed,
  - voltage drops limited.
- Starting "Boost":
  - starting assured whatever the conditions (gantry).

■ Power: from 0.75 to 15 kW

Advanced systems.  
Decentralised architectures.  
Pumps.  
Fans.  
Conveyors.  
Washing gantries...

- Open to all communication protocols.
- Be aware of the various machine states:
  - overload, underload,
  - machine wear (number of operations, operating time, etc.).
- Protection of motors.
